

# H-PLUS Function Exercise: EMERGENCY: INJURY

#### **Function Command:**

## PLUS-CONTROL, BALANCE, RESTORE

### **Purpose:**

This is your H-PLUS Function exercise to learn to direct body healing in response to injury.

# **Application:**

To increase healing and balancing patterns of the autonomic system when physical injury occurs.

# Instructions For Use:

- 1. Listen to the exercise in a dimly lit area where you will not be disturbed. Be able to lie down comfortably or sit in a chair where your head will be supported by a head-rest.
- 2. Be sure your bladder is empty before beginning the exercise. Also, loosen any tight clothing, and use cover or blanket if room is cool as body may get cold.
- 3. Use a stereo cassette tape player with headphones and left-right volume control, if possible.
- 4. Keep exercise sound at a very soft volume, so that you can just barely hear and understand the voice, but no louder. Tune the left-right volume so the voice sounds exactly in the middle of your head.
- 5. Use the Preparation Exercise *first*, unless you have prior learning in other H-PLUS Functions.
- 6. Use the actual Function Exercise at least one day after learning the Preparation Exercise.

#### **Effectiveness Pattern:**

- At the very minimum, most Functions will move into place no earlier than two minutes after the Function Command is given.
- Most results are subtle rather than dramatic.
  Waiting and watching only delay the application.
- If no results whatsoever are noticed, repeat the above process (1-6). It may take three or more sessions to install the Function.
- Greatest results are achieved when H-PLUS Functions are applied in combination with each other. These are limited only by your own creativity.

#### **Suggestions For Use:**

• EMERGENCY: INJURY is aided by the H-PLUS Functions THINK FAST, RELAX, SHORT FIX and RESTORATIVE SLEEP.

Examples – If you're trapped in a car wreck with bleeding and other injuries, use EMER-GENCY: INJURY, RELAX and THINK FAST. If you suffer a cut while preparing a meal, apply first aid and do PLUS-CONTROL, BALANCE, RESTORE. After a fall which results in bruises and contusions, use EMERGENCY: INJURY, SHORT FIX and RESTORATIVE SLEEP at bedtime.

#### **Please Note:**

- This H-PLUS Function goes into effect without command if you are unconscious due to injury; if you are conscious, using the Function command speeds up and enhances the process.
- This Function exercise assists and potentiates your body's natural defense mechanisms and is not intended to substitute for other methods of treatment.
